FUTURE HACKS IOT EDITION

October 9-11, 2015, 100 developers, makers, designers and business people will come together at the Future Hacks Internet of Things in Madrid

October 9-11, 2015, 100 developers, makers, designers and business people will come together at the Future Hacks Internet of Things in Madrid

The hackathon is 54 hours of hacking and building awesome stuff, and the format is simple:

1. Form teams and ideate on disruptive IoT solutions
2. Hack and build awesome stuff
3. Design and launch prototype
4. Pitch for a handpicked expert jury

So your task is straightforward: get from idea to prototype in 54 hours. No talk, all action!

Everyone can bring an idea for a hack project or an idea – but you don't need an idea or a concept to participate, what you do need is an interest in learning and connecting with others.

And why IoT? Well the new rule for the future is going to be, "anything that can be connected, will be connected". So lets disrupt the future of IoT – We only have 100 seats. Hurry up!
